LEGACY RAILS & THE AI THAT COULDN'T

THE SYSTEM NOBODY UNDERSTOOD (INCLUDING AI)

San Francisco Ruby Conference · SFJAZZ
Tuesday, Nov 10, 2026 · 10:35 am

Every scaled Rails app has a stretch of backcountry nobody dares hike into: the part no one fully understands, so you patch it for years, until you can't. Ours had a critical bridge out there. The map showed it, the report said passable; I hiked in and it was all but gone. Our dashboards, our tenured engineers, and our AI were all confidently wrong. This is how we learned to trust only the ground.
